Education

University of Electronic Science and Technology of China (985) September 2023 - June 2026

- Master of Engineering | Biomedical Engineering | Supervisor: Dezhong Yao | GPA: 3.0/4.0

Shenzhen University

September 2019 - July 2023

- Bachelor of Engineering | Biomedical Engineering | Supervisor: Zhen Liang | GPA: 3.5/4.5

Research Interests

Large language models for physiological signals

- I am interested in large language models (LLMs) and multi-modal research for physiological signals. Recently, I have been continuously learning technologies related to LLMs and multimodal methods, hoping to apply these advanced technologies to physiological signals.

Cognition-inspired AI for Brain Decoding and Real-world Applications

- Exploring how cognitive principles can guide AI models for more interpretable and generalizable brain decoding, with an aim toward practical use in real-world scenarios.

Research Experience

National Science and Technology Innovation 2030: Major Project

Aug 2022 - Aug 2027

Topic: Novel Non-invasive BCI Decoding Technology

- **Contributions:** Focused on emotion recognition based on brain networks, leveraging the neural mechanisms of brain networks as cognitive priors. Developed a supervised graph deep learning method that effectively captures network topological patterns under different emotional states, enabling discriminative representations. This approach was used to construct an efficient and feasible real-time emotion decoding system. Publication: [2] [3] [4] [6]

DuA: Dual attentive transformer in long-term continuous EEG emotion analysis

Research Assistant, Supervised by Professor Zhen Liang, SZU

2021 – 2023

- Applied network frameworks such as CNN, LSTM, and DANN to the emotion recognition of long-term continuous EEG and conducted replication experiments.

- Improved Transformer and proposed a dual attention model for long-term continuous EEG.
- The attention visualization results that focus on the later time of EEG are consistent with the research finding that emotions require time accumulation.

Academic Contests

➤ Huawei Cup·6th China Graduate AI Innovation Competition	National First Prize	Oct 2024
➤ National Biomedical Engineering Innovation Design Competition	National Second Prize	July 2024
➤ 2021 National Undergraduate Mathematical Contest in Modeling	National Second Prize	Sept 2021
➤ 2021 World Robot Contest BCI Robot Technical Competition	Third Prize (Global)	Aug 2021

Honors & Awards

National Scholarship	Nov 2025
First-Class Academic Scholarship	Nov 2025
First-Class Academic Scholarship	Nov 2024
First-Class Academic Scholarship	Nov 2023
Outstanding Undergraduate Thesis	June 2023
Outstanding Graduate	June 2023
Scholarship Star of Shenzhen university	Dec 2022

Skills

- ✓ **Programming Languages:** Proficient in MATLAB and Python.
- ✓ **English:** CET-6; IELTS: 6.5; proficient in academic reading; conversational speaking skills.
- ✓ **Teamwork:** Experienced in leading and participating in multiple research projects and competitions, with strong teamwork and communication skills.
